The number of months the manatee has been conditioned with vegetation  Name The name of the manatee; can only one word and have no punctuation or numbers Names cannot be duplicates from other systems (i.e., MIPS)  Other Text (for death record) The explanation of death causes and details not found in the tables  Participating Organizations (for all types of records) The names of all participating organizations, separated by commas  The Password or the system  Permit Expiration Date The date the research permit expires mm/dd/yyyy  Permit Number The permit number for the research project  Permit Type The type of permit		
Name The name of the manatee; can only one word and have no punctuation or numbers Names cannot be duplicates from other systems (i.e., MIPS)  Other Text (for death record) The explanation of death causes and details not found in the tables  Participating Organizations (for all types of records) The names of all participating organizations, separated by commas  The Password The Password for the system  Permit Expiration Date The date the research permit expires mm/dd/yyyy  Permit Number The permit number for the research project  Permit Type The type of permit	Months with vegetation?	
Names cannot be duplicates from other systems (i.e., MIPS)  Other Text (for death record) The explanation of death causes and details not found in the tables  Participating Organizations (for all types of records) The names of all participating organizations, separated by commas  Password The Password for the system  Permit Expiration Date The date the research permit expires mm/dd/yyyy  Permit Number The permit number for the research project  Permit Type The type of permit	NT	
Other Text (for death record)  Participating Organizations (for all types of records)  Password  Permit Expiration Date  The Password for the research permit expires mm/dd/yyyy  Permit Number  Permit Type  The explanation of death causes and details not found in the tables  The names of all participating organizations, separated by commas  The Password by the system  The Password permit expires mm/dd/yyyy  The permit number for the research project  The type of permit	Name	
Participating Organizations (for all types of records)  Password  Permit Expiration Date  The Password for the system  The date the research permit expires mm/dd/yyyy  Permit Number  The permit number for the research project  Permit Type  The type of permit	Other Text (for death record)	The explanation of death causes and details not found in the tables
of records)  Password The Password for the system  Permit Expiration Date The date the research permit expires mm/dd/yyyy  Permit Number The permit number for the research project  Permit Type The type of permit		-
Password The Password for the system  Permit Expiration Date The date the research permit expires mm/dd/yyyy  Permit Number The permit number for the research project  Permit Type The type of permit	of records)	The names of an participating organizations, separated by commiss
Permit Expiration Date The date the research permit expires mm/dd/yyyy  Permit Number The permit number for the research project  Permit Type The type of permit		The Password for the system
Permit Number The permit number for the research project Permit Type The type of permit		
Permit Type The type of permit		
1.1		1 0
	Phone	The phone number of user; phone number format xxx-xxxx

PI Address	The mailing address of PI
PI email	The email address of the PI
PI Name	The name of PI
PI Org	The organization where the PI is affiliated
PI Phone	The phone number of PI.; phone number format xxx-xxx-xxxx
PI ID	Code for PI
Pot Status	The status of the crab pot (Active, Derelict, Unknown)
Primary ID	The single primary ID for an animal that can be used on reports (1=Primary ID, 0 = Not Primary ID)
-	An animal can only have one primary ID
	When a new animal is rescued, all ID's should be entered; Set the facility ID to be the primary ID, which will be
	entered in the initial rescue record (unless the animal already has a primary ID); if no facility ID, set the rescue ID to
	be the primary ID .
Primary Name	The primary name for the manatee; only one primary name is allowed for each manatee
	If the manatee has a primary ID then $Yes = 1$ , otherwise $No = 0$
Primary Rescue Cause ID	The cause and detail of the manatee rescue
Primary Research Category	The primary research category
Project	The project name
Project ID	Short ID for project.
Rearing Type	The method of rearing; select wild reared, orphan hand reared, orphan foster reared, captive born hand reared,
	captive born foster reared, captive born dam reared
Release Date	The date the manatee is to be released mm/dd/yyyy.
Release Site	The site where the manatee was released
Release Status	The release status of the manatee; releasable, select conditionally releasable, conditionally non-releasable, Non-
	releasable Pre-Act
Release Time	The time period before the animal will be released; select > 1 year or within one year
Release Water type	From Pre-Release Authorization; only required for naïve animals
	The type of water at release site; select brackish/saltwater, fresh or unknown
Report Date	The date the record was first posted to database mm/dd/yyyy
Reporter	The individual who first posted the record to database.
	"D" will be entered for all records that have not be modified since their intial entry into the database
Rescue Date	The date manatee was rescued mm/dd/yyyy
Rescue ID	Any ID from another system associated with the manatee (e.g., Facility ID, Tracking ID, Mortality ID).
Rescue Per Day	The number of rescues for the manatee for each rescue day. Unless a manatee is rescued twice in one day, rescue
	per day will always be 1.
Rescue Type	The type of rescue; select brought into captivity, assist and release, unsuccessful rescue or incidental rescue)
Secondary Cause of Rescue Detail ID	The secondary cause of the manatee rescue
Secondary Research Category	The secondary research category
Security Group	The code for the security group
Sex	The sex of the manatee
Sire Mlog	The Mlog of Sire
Specify	Text to explain "other" in either primary rescue cause or primary rescue cause detail
- I · · · J	Fyyyyyy

C D.	TT 1
Start Date	The start date of the manatee research project mm/dd/yyyy
State (from the release record)	The state where animal was released
State (from the rescue record)	The state where animal was rescued
Stimulus	The type of stimulus that is being used for conditioning
Studbook	The studbook number
Subject/Research Question	The subject or research question for the manatee project
Suspected Pregnant?	Is the animal suspected to be pregnant? Select Yes, No or Unknown
System	The system which named the animal (e.g., MIPS)
Tag Identifier	The identifier for the specific manatee tag (e.g., tag number, radio frequency)
Tag Information	The additional information about the tag such as color, etc
Tag Type	The type of tag (e.g., Pit, satellite, freeze brand)
Title	The title of project
Tracker	The name of the person tracking the manatee
Transporter	The organization that transports the manatee
Type of Gear	The type of gear the manatee entangled is in
User ID	The unique identifier for every user of system; must be at least 5 characters, and no more than 10
Vegetation Type	From Pre-Release Authorization; only required for naïve animals
	The types of vegetation the manatee has been fed during rehabilitation
Veterinarian	The attending manatee veterinarian
Water type of Display?	From Pre-Release Authorization; only required for naïve animals
	The type of water the manatee lives in at the facility; select brackish/saltwater, fresh, or unknown
Waterway (from release record)	The waterway where animal was released
Waterway (from rescue record)	The waterway where animal was rescued
Weight	Weight of the manatee in kg; round to the nearest whole number
Weight Date	The date the manatee was weighed mm/dd/yyyy
Where Conceived	Was the manatee conceived in wild or in captivity
Where re-located?	The location where the manatee was re-located
Year Report	The part of the year the report is being entered
